## Software Developer Intern

06/2019 – 08/2019 (Mavi Alp, Trabzon)

Worked on an IoT project using LoRa technology.

- Gained experience in embedded systems and application development.

## Software Developer Intern

06/2018 – 08/2018 (Proline Integrated Intelligence, Istanbul)

Developed Full-Stack Web Applications as part of the R&D department

- Worked with various technologies such as JavaScript, Apache Kafka, MySQL, and MongoDB to build web applications.

## Founder

2008 (<https://emreoyun05.tr.gg/>)

My first Website

- In 2008, I created a website using a control panel where I shared Adobe Flash games that I liked. Most of the content was only accessible after logging in. The website is still online, but the design and content are now broken. I also no longer have access to the control panel, but it was a valuable experience for me to learn about web development and running a website.

## EDUCATION

09/2014 – 03/2022

Karadeniz Technical University, Trabzon (Türkiye)  
Computer Engineering B.Sc.

09/2002 – 07/2014

Cankaya Lisesi, **High School**

## SKILLS

- Javascript & Typescript
  - Node.js
  - Express.js
  - React.js (Router, Redux)
  - Mocha.js
- Solidity
  - Hardhat/Truffle mit Web3.js / Ether.js
- HTML/CSS
- SQL/noSQL (MySQL/MongoDB)
- Message Broker (RabbitMQ)
- Linux (Ubuntu)
- Jira / Git
- Turkish (Mother Language)
- German (B1)
- English (C1)
